Letter of Recommendation for Joe Lennox:

Joe Lennox has done three programs at the library for two different age groups: Grades 1 to 3 and Grades 4 and up. Parents came to both programs, and interest was high for both the children and the adults.

Mr. Lennox has an impressive knowledge of his subject, humans in space, and a knack of making a complex subject interesting and understandable to children. His enthusiasm is catching and his energy level high. The many science demonstrations and comparisons he makes are interesting and helpful. He brings models and other interesting objects to illustrate his talk.

After the program ended, children checked out books on the topic to read, proof to me that he sparked an interest in them.

I feel he does an excellent job of teaching about the space program.

Sincerely,

Susan Mengers
Director of Children's Services
