Relevance of Lesson to Course Description	✓			

Special Learning Need of Gifted Students

On a scale from one to five, indicate to which extent the following were evident: (One is most evident)

	1	2	3	4	5
Students were challenged to examine and question information.	✓				
Teacher led students in evaluation and their responses to it.	✓				
Students were encouraged to do new and different things with information.	✓				
Teacher used information to cross into new curricular areas.	✓				
Teacher used student input to build on prepared lesson plan.	✓				
Teacher solicited both factual and emotional responses.	✓				
Teacher facilitated flexible and open-ended discussion.	✓				
Curriculum was future oriented.	✓				

Please add your narrative to the above. Please use other side if necessary. Thank you.

This was an excellent class. Mr. Lennox used a video of Mars to discuss similarities and differences in planets. He also showed and allowed us all to touch solar panels used in this unmanned flight. The students were enthusiastic about the topics which also included ~~the~~ discussion of the recent election and its implications for the space program.

Class Observed By Marilyn Byslowsky
